## **DETAILED ACTION**

## **Amendment**

1. Receipt is acknowledged of the after-final amendment filed 12 November 2004, which has been entered.

## Allowable Subject Matter

- 2. Claims 3-6, 13-23, and 26 are allowed.
- 3. The following is an examiner's statement of reasons for allowance:

Although the best prior art of record of Huang, Yano, and Oishi do teach conventional semiconductor marking methods, the best prior art of record fails to particularly teach the specific arrangement as recited in claim 26 and its dependent claims. For example, the best prior art of record fails to teach a first identifying mark that is separate and distinct from a second mark, wherein each of the marks are identical in content and format and are placed on the interior wall of a notch on a plurality of semiconductor wafers, wherein the semiconductor wafers are stored and the marks simultaneously read. Hence the best prior art of record fails to teach the invention as set forth in claims 3-6, 13-23, and 26 and the examiner can find no teaching of the specific method of reading a mark on a semiconductor wafer, nor reasons within the cited prior art or on her own to combine the elements of these references other than the applicant's own reasoning to fully encompass the current pending claims. In addition, see applicant's reasoning in amendment/response filed 12 November 2004.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
